

The first announcement for the 2016

International Conference on Ganoderma Research

10th to 13th November, 2016, Fuzhou, China

Since the new century, Ganoderma (Lingzhi) research such as basic study, product development and medical applications of fungus has been paid extensive attention. Particularly, genetic characteristics, modern cultivation techniques, active ingredients and quality control of products, new product development, pharmacological effects and mechanism, clinical trial and studies to preserve one's health of Ganoderma have made great progress. In order to exchange new information and resolve troublesome problems of Ganoderma industrial development, **the 2016 International Conference on Ganoderma Research** will be held in Fuzhou, Fujian province, China from 10th to 13th November, 2016 by the International Society on Ganoderma Research (ISGR), United Nations Industrial Development Organization (UNIDO), the China Edible Fungi Association and Fuzhou Municipal People's Government. The Conference will be hosted by the Fuzhou City Bureau of Agriculture and Fujian Xianzhilou Biotechnology Group

Theme: Scientific and technological innovation and Ganoderma (Lingzhi) industrial development.

Key Subject: (1) The new achievements on research of Ganoderma fruiting body, mycelium and spores and its product's investigation, development and application; (2) The clinical research and functional studies for human health on Ganoderma products; (3) Existence problems in the research and development of Ganoderma and how to solve them; (4) Historical and cultural studies on Ganoderma.

Meeting schedule (custom temporary)

I. The scientific program (From 11th to 13th November, 2016)

Content: Opening ceremony and meeting academic report (including invited plenary lecture, paper presentations, round-table discussions, etc. For details, see the second announcement).

Location: Fujian Grand Theatre, Fuzhou.

III. Visit Ganoderma manufacture and mushroom world (13th November,

2016) .

Location: Fujian Xianzhilou Biotechnology Co., Ltd and Ganoderma cultivated place.

Languages for the conference

Chinese/English (Organization of the session simultaneous translation)

Call for abstracts

Meeting organizer will publish abstract book. The abstracts should be limited within 1000 words, may be written in either Chinese or English, and the meeting organizer will encourage abstracts to be written in both Chinese and English.

Abstract requirement: the content should include the objective, method, result (including important data), discussion, and conclusion. The title will be printed in black font 3, author(s) and organization in small block letter word 4, and the text in Times New Roman typeface 5. The electronic version of abstracts must be e-mailed to 13641280216@126.com (Dr. LI Wei-dong, Department of Pharmacology, Peking University Health Science Center). Submitting will be expired on 30 September, 2016.

Program

The meeting reports will include plenary lecture (invited by the organizing committee, lasting 45 minutes) and oral presentation (selected from the submitted papers by the organizing committee, lasting 15 minutes). Computers and projectors will be provided by the organizer, so that participants will be required to represent their reports by Power Point. The PPT in both Chinese and English will be welcome.
